SUMMARY

Results-driven Full Stack Java Developer and Founder with 9+ years of experience designing, developing, and modernizing enterprise software across telecommunications, healthcare, IoT, AI, blockchain, and cloud environments. Proven ability to architect cloud-native applications, automate CI/CD pipelines, modernize legacy systems, and deliver scalable custom software solutions.

TECHNICAL SKILLS

Backend:	Java, Spring Boot, Hibernate JPA, MyBatis, Python (Django & Spark), C/C++
Frontend:	React, Angular (TypeScript), JSP, JavaScript, jQuery
Databases:	MySQL/MariaDB, PostgreSQL, Oracle DB, MS-SQL, MongoDB, Redis
DevOps & Cloud:	AWS (EC2, RDS, S3, Route53, CloudFront, Lambda, EKS & ECS, Load Balancer), Cloudflare Pages/Edge, Docker, Kubernetes + ArgoCD, Jenkins, GitHub Actions
Data Engineering:	Kafka, Hadoop, Spark, Hive, Apache Nifi, Streamsets
Infrastructure:	Tomcat, Oracle WebLogic, Cisco Networks (CCNP), VMware Harbor, Linux

EXPERIENCE

Founder GSLab — GSLAB LLC · Self-employed
2025 – Present
Atlanta, GA · Remote

- Founded GSLAB LLC to design, architect, and deploy custom web applications, cloud infrastructure, and automation systems tailored for small business owners and growing enterprises.
- Engineer full-stack web applications and internal business tools combining custom backend logic (Java Spring Boot, Python, PostgreSQL, REST APIs) with modern frontend frameworks and AI-assisted platforms.
- Architect high-availability cloud and edge deployment pipelines utilizing AWS (EC2, RDS), Cloudflare Pages/Edge, Docker, and automated CI/CD workflows.
- Partner directly with business owners to replace manual operational workflows with scalable, custom-built software solutions.

Java Software Developer — Compax Digital
2023 – 2024
Seoul, South Korea

- Integrated enterprise BSS platforms with LG U+ Nerget and StarHub telecommunication systems using Java Spring (JSF & Hibernate JPA) and PostgreSQL.
- Managed AWS cloud infrastructure including EC2, RDS, VPC, Route 53, and EKS Kubernetes clusters (GitHub Actions & ArgoCD) supporting production applications.
- Configured and maintained Cisco ISR routers, Catalyst switches, and ASA firewalls.
- Collaborated with cross-functional teams to deliver enterprise system integrations on schedule.

Software Architect — CK&B
2023

Seoul, South Korea

- Designed backend architecture for the Hidden Tag Global platform serving authentication, community, review, and marketplace services.
- Developed RESTful APIs and database architecture using Spring Boot, Hibernate JPA, MyBatis, and MySQL.
- Migrated application deployment from traditional Tomcat servers to Docker-based containerized infrastructure on AWS.
- Successfully supported the production launch of the Hidden Tag Global platform.

Application Architect — LG CNS
2022 – 2023

Seoul, South Korea

- Modernized the SEHATI Bahrain National Health Insurance System on AWS: JDK 7 → 8, Tomcat 7 → 9, Oracle RDS 12c → 19c.
- Built CI/CD pipelines and automated deployments in a GitOps / ArgoCD Kubernetes system for the Next Generation GS Postbox system.
- Automated deployments with Jenkins for the LG U+ Digital Catalog system on the Adobe AEM framework via custom Maven profiles.
- Managed and deployed interface services (MCI/FEP/EAI service mesh) for Shinhan Bank's The Next Project.
- Developed Java Batch services in MyBatis for the next-generation Korean social security information system.

Software Developer — BFLabs
2021 – 2022

Seoul, South Korea

- Developed an integrated REST API gateway server in Java Spring for the Middleblock blockchain platform (Hyperledger Indy, Aries & Fabric).
- Designed and implemented the big data warehouse infrastructure and monitoring platform for the Yeosu Data Flagship project using Hadoop, Spark, Hive, Django, and React.

Software Developer — SIOT InfoTech
2020 – 2021

Seoul, South Korea

- Migrated the main Sensor Gateway backend from Go to Java Spring (TCP/IP socket, gRPC, REST API) and implemented Kafka-based data pipelines.
- Upgraded Kafka pipelines with Apache Nifi and Streamsets; built the Goseong & Sacheon tourist sensor IoT dashboard (React, Java Spring, MariaDB).
- Managed Docker-based AWS production environments supporting multiple customer applications.

AI Software Developer — MICUBE Solution
2018 – 2019

Seoul, South Korea

- Developed the MICUBE AI Visualization Tool dashboard for a KISA government project using Java Spring, Angular, and Python.
- Built predictive equipment maintenance applications for Daeduk Electronics with a TensorFlow RMSE model on vibration sensor data.
- Developed a computer-vision rock detection application for Hyundai Chungju Biocenter using TensorFlow Mask R-CNN.
- Managed Hadoop, Kafka, Ambari, and Linux server infrastructure.

Career Break — Family Care & Reskilling — Independent Study · Career Break
2015 – 2017

Georgia, USA

- Took a career break to care for a family member diagnosed with cancer.
- During this period, studied software development and network engineering, earning the Cisco CCNP certification to pursue network engineering before returning to software engineering.

Software Developer — General Motors · Full-time 2013 – 2014
Atlanta, GA

- Developed and improved the North America Order Workbench (NAOWB) — GM's car POS application for dealerships — using J2EE, JavaScript, and CSS.
- Completed the NAOWB Browser Agnostic project, modernizing the application to run on Chrome, Firefox and IE11 (previously IE9-only) through JSP and JavaScript improvements plus J2EE backend performance tuning.
- Set up, managed and deployed the NAOWB application to WebLogic test environments on SUSE Enterprise Linux; managed Oracle 11g and IBM DB2 connections, DNS / DHCP / LDAP configuration, and wrote shell scripts to automate test deployments by pulling from the Artifactory repository via cron jobs.
- Supported Oracle Database migration from the Ingres database.

EDUCATION

M.S. Electrical & Computer Engineering — Georgia Institute of Technology, Atlanta, GA
Focus: Telecommunication and Computer Systems / Software

B.S. Electrical Engineering — Georgia Institute of Technology, Atlanta, GA

CERTIFICATIONS & LANGUAGES

- Microsoft Specialist: Programming in C# — Microsoft, ID 701ACF-A13055, earned May 2015
- Microsoft Certified Solutions Expert: Private Cloud — Microsoft, ID 35KEB5-7386CA, earned Apr 2013, inactive
- MCSA: Windows Server 2012 (Charter Member) — Microsoft, ID D60814-988F4Q, earned Mar 2013, inactive
- CCNP Routing and Switching — Cisco, ID CSCO12143672, earned Jan 2015, expired Jan 2018
- CCNA Routing and Switching — Cisco, ID CSCO12143672, earned Feb 2013, expired Jan 2018
- CompTIA Security+ ce — CompTIA, ID COMP001020382835, earned Sep 2015, expired Sep 2018
- CompTIA Network+ ce — CompTIA, ID COMP001020382835, earned Mar 2012, expired Mar 2015
